THE TYRANNOSAUR CHRONICLES: THE BIOLOGY OF THE TYRANT DINOSAURS

Bloomsbury Publishing PLC. Hardback. Book Condition: new. BRAND NEW, The Tyrannosaur Chronicles: The Biology of the Tyrant Dinosaurs, David Hone, Tyrannosaurus is by some margin the most famous dinosaur in the world, adored by children and adults alike, and it is often the only one that many people can name. An impressive beast, it topped 6 tons, was more than 13m long, and had the largest head and most powerful bite of any land animal, ever. Despite the hype, Tyrannosaurus and its relatives (the tyrannosaurs) are fascinating animals, and perhaps the best-studied of all dinosaur groups. They started small, just a couple of metres long, and over the course of 100 million years evolved into the giant meat-slicing bone-crushers that the world is now familiar with. The Tyrannosaur Chronicles tracks the rise of these dinosaurs, and presents the latest research into their biology, showing off more than just their impressive statistics - tyrannosaurs had feathers, may have hunted in groups, and fought and even ate each other. This entertaining book presents the science behind this research, and tells the evolutionary story of the group through their anatomy, ecology and behaviour, exploring how they came to be the dominant terrestrial predators of the Mesozoic.
