Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Manual of Meteorology, Vol. 4: Meteorological Calculus; Pressure and Wind (a Revised Edition of Part IV, 1919) The volume now presented is a revised edition of Part IV which was issued in advance in 1919. There are besides two chapters introductory to the theory of motion under balanced forces which had been adopted in Part iv as the basis of the relation between pressure and wind, and two chapters supplementary, summing up the position with regard to the theory of the general circulation of the atmosphere and its local disturbances. Here we need only account for the limitations of the work now ended. Its purpose was to give the reader an idea of the general problem of the meteorology of the globe and of the material and methods which are available for its solution. More narrowly stated the problem is to provide a rational quantitative explanation of the sequence of the phenomena of weather in any locality - its first stage to trace the phenomena to their natural causes and identify the physical and dynamical processes by which the sequence is controlled. In Nature the account which has been given of the physical processes of weather in Vol.III has been called discursive, and with at least equal justice the epithet may be applied to the account of the dynamical processes in this last volume; and there is no reason for resentment on that account. Fifty years ago similar remarks were often made about Maxwell s Theory of Heat, an extraordinary textbook, the perusal of which may even now be recommended to students of meteorology as a good resolution for every New Year, though neither author...
